Welcome Andino,Cristian

OUT 12-19-2022 12:16 PM

Notes

This is a punch OUT note

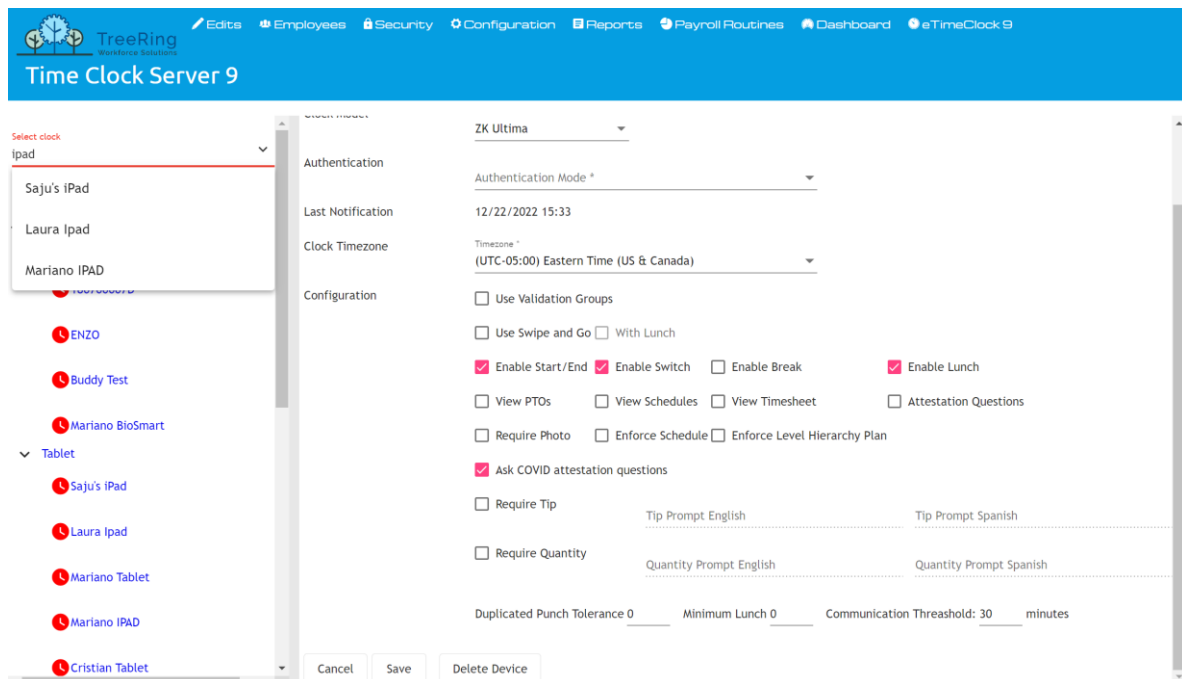

Ok

Cancel

TIMECLOCK SERVER 9

- Added filter selection to clock servers, allowing you to search devices in the clocks' tree.
- Added highlighting selected option to the picked clock.
- In addition, the clocks' tree can be shown clocks descriptions, clock serial numbers, or both.
- Now it is possible to change the width of clock columns.
- It was added to the new time zone Athens/Bucharest.

Import Dates

Now you are able to use dates with and without zero in the month. For instance, if you define MM/dd/yyyy you can import M/d/yyyy and vice versa.

OT Policies

There is a new configuration that allows you to change the employees to another OT Policy. By default, this configuration is disabled, and have to ask us to set it up.

Paid Lunches

Added Paid Lunch punch handling to be able to edit PaidLunch transactions too.
